handled confidential info/PII -managed multiple large tasks/assignments and regularly reached goals/quotas -followed multiple detail oriented work instructions -large amount of experience processing and inputting huge amounts of data -experience in all Microsoft applications
-typing/computer work skills -experience in customer care/phone calls

Security Analyst HomeLab:

Created a VM in Microsoft Azure and conducted an analysis on controlled real-time attacks using Azure Sentinel(SIEM):

- Using a PowerShell Script to record meta data from Windows Event Viewer to parse through a third party geolocation API converting it into usable geolocation data.
- Utilized and configured the Log Analytics workspace in Azure to retrieve the log file from the VM and convert it into a custom table to extract the raw data.
- Extracted the Raw Data using a query in Log Analytics that separated the information into defined location categories for use in Sentinel.
- Using Microsoft's Cloud Based SIEM (Sentinel) graphed and mapped the geolocation data from attackers obtained in the extracted log data to plot security events on a global map and identify attack origins, showing brute force RDP's.

MTA: Software Development Fundamentals - Certified 30 APR 2018.

MTA: Security Fundamentals - Certified 30 APR 2021.

Experience in **Object Oriented Programs/Projects (Java/Js)**

Experience **creating Interactive Web Pages (Html/Css)**, and **Basic Data Bases(Sql)**.
